### DETAILED ACTION

1. The abstract of the disclosure is objected to because it exceeds 150 words. Correction is required. See MPEP § 608.01(b).

#### *Claim Objections*

2. Claims 3 and 6 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

#### *Claim Rejections - 35 USC § 103*

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over prior art Figs. 1A-2B in view of Hofmann et al. (USPN 5,738,180).

Prior art Figs. 1A-2B disclose all of the instantly claimed invention except a third reference protrusion.

Hofmann et al. shows a third reference protrusion.

To modify the apparatus of Prior art Figs. 1A-2B so as to provide a third reference protrusion would have been obvious to one of ordinary skill in the art at the time the invention

Art Unit: 3682

was made in view of the teachings of Hofmann et al. that such an arrangement improves the alignment of the footrest (see column 3, lines 30-40).
